

ICPA 7th Conference & Exhibition

TOPIC: PIMART-THE ROLE OF THE PHARMACIST

Join us at the ICPA 7th Conference for a thought-provoking talk by Jackie Maimin and Tsitsi Nyamuzihwa as they collectively delve into the crucial role of pharmacists in the innovative and transformative realm of PIMART (Pharmacy-Integrated Management of Antiretroviral Therapy).

With extensive background as a community pharmacist and research pharmacist and a passion for leveraging pharmacy expertise to address public health challenges, Jackie and Tsitsi is set to inspire and inform attendees.

In their presentation, Jackie and Tsitsi will shed light on the multifaceted dimensions of PIMART, an emerging approach that intersects pharmacy practice with the management of antiretroviral therapy, particularly in the context of HIV/AIDS. Drawing from experience in clinical research and the extensive work on HIV prevention and treatment trials, they will explore how pharmacists can become central figures in this paradigm shift.

Jackie and Tsitsi's talk will also highlight the pivotal role pharmacists play in bridging the gap between patients and effective healthcare services. Integrating pharmacy services into the management of antiretroviral therapy showcases how pharmacists can enhance treatment adherence, improve patient outcomes, and contribute significantly to the overall public health effort.

Don't miss this opportunity to gain insights through this exploration of the pharmacist's role in the emerging era of PIMART.

ICPA 7th Conference & Exhibition

Learning Outcomes:

Pharmacists can enhance their continued professional development by attending this talk on "PIMART - the role of the pharmacist" at the ICPA 7th Conference in the following ways:

Advanced Understanding of PIMART: Attendees will gain an in-depth understanding of PIMART, an evolving approach in pharmacy practice. This knowledge will allow pharmacists to stay at the forefront of their field, ensuring they are well-equipped to implement or contribute to PIMART initiatives in their own practice settings.

Clinical Skills Enhancement: Jackie and Tsitsi's insights into the integration of antiretroviral therapy management into pharmacy practice can help pharmacists enhance their clinical skills. By learning about the latest techniques and strategies for patient care in the context of HIV/AIDS treatment, pharmacists can provide more effective and specialized care to their patients.

Public Health Engagement: The talk will emphasize the role of pharmacists in addressing public health challenges. Pharmacists can apply this knowledge to engage more actively in public health initiatives within their communities. This may involve collaborating with healthcare teams, advocacy work, or contributing to research and implementation studies.
