

ICPA 7th Conference & Exhibition

TOPIC: The Value of Pharmacy Services for People Living with Diabetes

We are thrilled to announce an enlightening and insightful talk by Leigh van der Bijl on the topic of "The Value of Pharmacy Services for People Living with Diabetes." Leigh is a distinguished professional with a wealth of experience and expertise in the healthcare and pharmaceutical industry.

In her presentation, Leigh will explore the pivotal role of pharmacy services in the lives of individuals living with diabetes. Diabetes is a chronic condition that affects millions worldwide, and effective management is crucial. Pharmacy services play a vital role in ensuring that individuals with diabetes receive the support, education, and resources they need to lead healthy and fulfilling lives.

Drawing from her extensive background as a leader in the pharmaceutical industry, Leigh will discuss the various ways in which pharmacy services can make a significant impact on diabetes management. From medication management and adherence support to education on lifestyle choices, monitoring, and preventive care, pharmacy services offer a comprehensive approach to diabetes care.

Gain valuable insights into the latest trends and innovations in diabetes management and how pharmacists can be a central part of the support system. Leigh's talk promises to be a must-attend session for healthcare professionals, researchers, and anyone interested in improving the lives of those living with diabetes.

Don't miss this opportunity to learn from Leigh van der Bijl and discover how pharmacy services can enhance the well-being of individuals with diabetes.

Learning Outcomes:

Community pharmacists can enhance their continued professional development by attending Leigh van der Bijl's talk in the following ways:

Advanced insights into diabetes management.

They can learn about the latest treatment options, strategies for improving patient adherence, and emerging trends in diabetes care. This knowledge will enable them to offer more informed and personalized guidance to individuals with diabetes who rely on their expertise.

learn about innovative approaches to optimizing pharmacy services for individuals with diabetes.

This includes leveraging technology, expanding patient education initiatives, and collaborating with healthcare teams to ensure holistic diabetes care. By implementing these strategies, pharmacists can enhance the value they provide to their patients and position themselves as essential partners in diabetes management.

Pharmacists can gain insights into the importance of preventative care in diabetes management. This talk may highlight how pharmacists can proactively counsel patients on lifestyle modifications, early detection, and risk reduction strategies. By integrating preventative care measures into their practice, pharmacists can contribute to better health outcomes for their patients
